## SUMMARY

---

Creative and result-driven software engineer graduate (April 2022) with great attention to details and problem-solving skill. As a great communicator and multitasker, I can work well with other team members as well as doing solo projects.

After 5 years of working in finance and accounting role, I decided to devote myself into pursuing what I am passionate about, programming. I love challenging myself and translating my creative mind onto the computer screen. I am looking for a junior software engineer position to help me develop my skills while using my knowledge to help the company launching great products.

## STRENGTHS

---

- Excellent problem-solving skill
- Excellent communication, bilingual (Spanish & English)
- Proficient on HTML5, CSS3 (SASS/SCSS), JavaScript (React.js, Node.js and Express.js, Ajax, ES6), Flask, and SQL (PostgreSQL).
- Full stack development of accessible, responsive and interactive websites.
- Use of APIs/RESTful APIs, Heroku for web apps
- User experience design and functionality
- Git and GitHub for version control and collaboration
- Functional programming, Object Oriented Programming
- Excellent organisational, and interpersonal skills
- Good attention to detail
- Team player with ability to work autonomously
- Ability to adapt to new environment fast
- Creative mind and critical thinking

## EDUCATION / QUALIFICATION

---

- 2021- 2022      Software Engineering Immersive course – General Assembly
- 2013- 2015      Certificate IV International Trade - Meadowbank TAFE, Sydney
- 2011              Completion of the Baccalaureate, (Spain)

## PROJECTS

---

Please find below brief description for some of the projects I have worked on. You can find all the details on the GitHub link above.

- [Tic-Tac-Toe](#): My first ever application. Simple Tic-Tac-Toe game using HTML, CSS & DOM.
- [Only Pets](#): Facebook like app for pet owners. Technologies used were Python, Flask & PostgreSQL.
- [Aka Izakaya](#): Website for a modern Japanese restaurant. Created with Node.js & Bootstrap.
- [Task Master](#): Air Tasker like app. Created with React.js, Node.js, Typescript.
